ABSTRACT

Various problems and requirements of the society and of the development of cities and regions may be solved by implementing renewable energy projects. Therefore, this study explores the issue of regional development through investments in renewable energy projects. Firstly, this study briefly reveals the role of renewable energy in regional development, and secondly, some arguments for investing in renewable energy projects at regional level are disclosed, including some concrete measures and actions for implementing renewable energy projects. The results of this study may be used for future research in the area of implementing renewable energy projects at regional level.

KEYWORDS: *investment, regional development, renewable energy.*
