

TEXT MINING – PREREQUISITE FOR KNOWLEDGE MANAGEMENT SYSTEMS

Lect. Dr. Dragoş Marcel VESPAN
The Academy of Economic Studies from Bucharest
dragos.vespan@ie.ase.ro

Abstract: Text mining is an interdisciplinary field with the main purpose of retrieving new knowledge from large collections of text documents. This paper presents the main techniques used for knowledge extraction through text mining and their main areas of applicability and emphasizes the importance of text mining in knowledge management systems.

Keywords: text mining, knowledge systems, information retrieval
