Abstract: Today we witness an increase in the role of universities in civil society. The international trends show the universities' openness towards the alternative offered by new technologies. The article shows the actual perspectives in our country, presents the main characteristics and the structure of a computerized university management system, and also indicates the possibility of informatic integration for the system modules. The development of such a project must be controlled and validated by a standardized methodology for project management, which is shown in the article.

Keywords: Project Management, informatic system, management of an educational institution, portal application integration, methodology, Prince2
